Secondary Technical School of Civil Engineering Hosts International FLIGHT Project Partner Meeting

In mid-April, the Secondary Technical School of Civil Engineering in Hurbanovo hosted a two-day monitoring meeting of the international FLIGHT Resource Center project. Partners reviewed project progress, task implementation, management issues, and the next steps for supporting vocational education teachers.

Co-funded by the European Union

This project has been funded with support from the European Commission. This communication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Partners Focus on Training Materials and the Development of the FLIGHT Resource Center

Special attention was given to the preparation of training materials, the development of the FLIGHT KIT, the creation of the handbook, and the building of the FLIGHT Resource Center as a shared space for project outputs and practical materials. Partners also discussed communication and dissemination activities to bring the project tools and experience closer to schools, teachers, and professionals.

Partners Strengthen Cooperation and Set the Course for the Next Phase of FLIGHT

The programme also included a partner round table, where organisations presented completed tasks, ongoing activities, and upcoming deadlines. The Hurbanovo meeting provided space not only to review progress, but also to strengthen cooperation and jointly plan the next phase of the FLIGHT project.
