

FLIGHT Project Presented at AgroMak 2026

As part of the Erasmus+ FLIGHT DSU RCSOO "Kiro Burnaz" from Kumanovo, North Macedonia, participated in the Second International Scientific Agri-Business Conference "AgroMak 2026".

Newsletter N° 9

FLIGHT at AgroMak 2026 – Innovation in Agriculture

The event brought together students, teachers, experts and professionals interested in innovation, sustainable development and new opportunities in the agricultural sector.

During the conference, our school presented the FLIGHT project and highlighted the potential of drone technology in modern agriculture, including crop monitoring, data collection and the early detection of plant diseases and pests.

The participation provided an opportunity to exchange knowledge, share experiences and establish new connections with professionals and institutions from the agri-business sector.

By connecting vocational education with innovative technologies, DSU RCSOO “Kiro Burnaz” continues to prepare students for the challenges and opportunities of the future of agriculture.
